

UI/UX

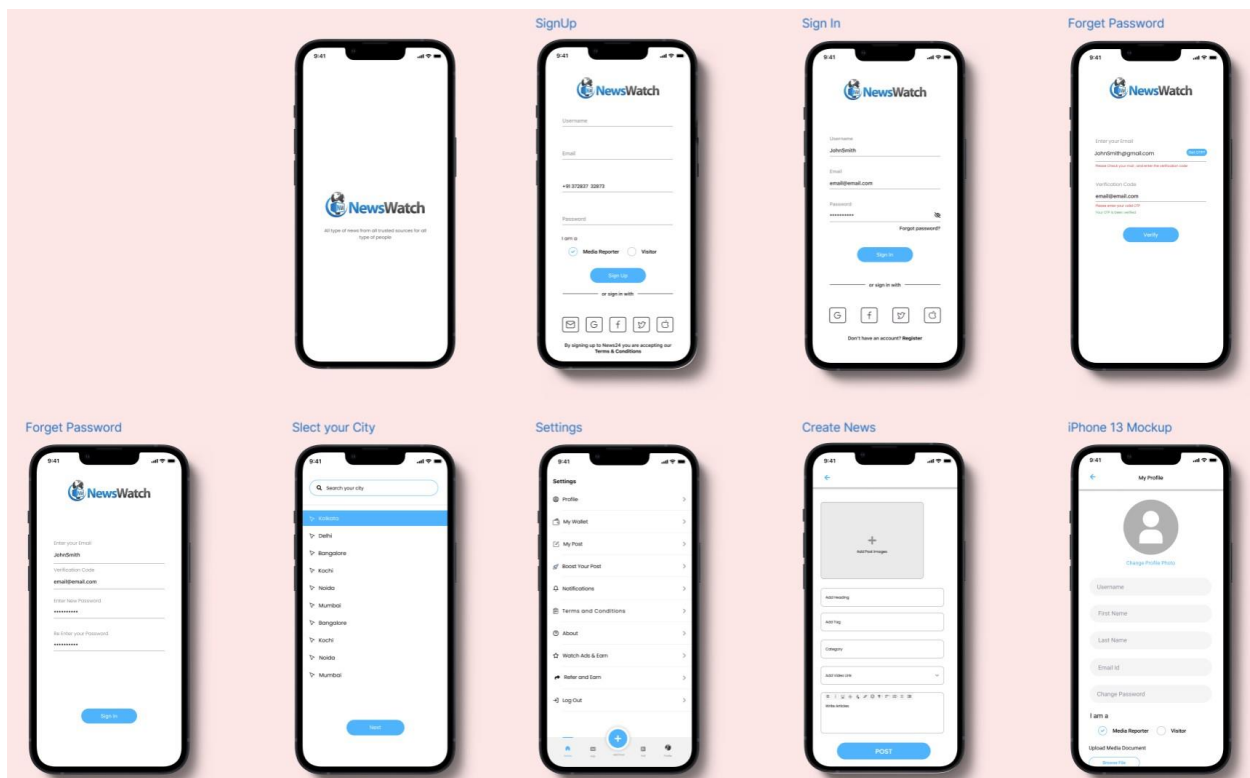

R.PRIYANKA (231701041)

Aim: Design a user-friendly news app UI that allows users to easily discover, read, and share the latest news articles and updates in real-time

. Procedure:

1. Research: Identify user needs, preferences, and analyze competitor news apps to determine essential features like personalized news, real-time updates, and easy navigation.
2. Wireframe: Create basic layouts and user flows for browsing news, reading articles, and managing preferences.
3. Design in Figma:
 - o Setup artboards for various devices (mobile, tablet, desktop).
 - o Design screens: Home, Categories, Article Detail, Search, Bookmarks, and Settings.
 - o Develop a style guide: Colors, typography, icons, and UI components.
 - o Prototype with interactive links to showcase the user flow and app functionality
3. Feedback: Share the designs with stakeholders and users for feedback, then refine the UI based on input for improved user experience.

Result: Deliver high-fidelity mockups, an interactive prototype, and a style guide, all ready for development to create a seamless and engaging news a
